

# COVID-19 & Breast Milk Study: Help Us Understand this New Virus

· Mommy's Milk ·  
HUMAN MILK RESEARCH BIOREPOSITORY

UC San Diego  
SCHOOL OF MEDICINE  
Center for Better Beginnings

The novel coronavirus, COVID-19, is impacting the entire world. Currently, there is little to no information about the transmission of COVID-19 from mother to child during breastfeeding, and the potential entry into breast milk from the infection, antiviral drugs and other treatments. We are currently enrolling breastfeeding women with COVID-19 exposure into our breast milk study.

**What's  
Required?**

**Please consider participating in our  
COVID-19 & Breast Milk Study.**

Help us understand if COVID-19 infection transfers from mom to child through breast milk, and the safest treatments for moms while breastfeeding.

**Who's  
Eligible?**

To participate or learn more, please contact  
us at (858) 246-1713 or [milkstudy@ucsd.edu](mailto:milkstudy@ucsd.edu) or visit
