MILK BANKING 101

MOTHERS COMPLETE A 3-STEP SCREENING BEFORE DONATING

1. Short phone interview in English or Spanish
2. Medical history questionnaire
3. Quick, free, no-fasting blood test screens for HIV, HTLV, Hepatitis, and Syphilis

MILK IS PROCESSED FOR SAFETY

- Every bottle is pasteurized in a specialized laboratory.
- Safeguards include quality assurance checks and third-party testing.
- Milk is frozen on dry ice and transported by courier or overnight shipping.

SAFE MILK SAVES LIVES

- Mothers donate their extra breastmilk instead of throwing it away.
- Fragile infants receive donor milk by prescription.
- Immunological properties prevent complications and enhanced survivability.
- Based on availability, some donor milk can serve healthy newborns.

COMMUNITY SUPPORT IS FREE

- The Baby Café program helps families with breastfeeding challenges.
- Enrichment classes include a wide variety of parenting education topics.
